Iron Oxide

- from Korea to the chemical companies of Ferric Chloride or Ferric Sulphate in Australia
- Fe₃O₄ content >99.00%
- For water Treatment
- We supply the chemical manufactures producing Ferric Chloride or Ferric Sulphate coagulants for waste, potable, and industrial water treatment.

About Iron Oxide

1. Iron Oxide Powder is produced as a byproduct of the steel mill. We produce high purity iron through secondary processing.
2. Iron Oxide Powder is a key material for electrical and electronic products and is used for transformers and noise rejection of home appliances such as TVs, refrigerators, washing machines and cell phones.
3. The iron oxide is used as a key component material for the magnet of various motors such as automobiles and speakers

* Used in Motor component material of / * Used in motor parts materials for automobiles
