## BOPP/PET Holographic Thermal Lamination Film

Item: BOPP/PET Holographic Thermal Lamination Film

Type: Transparent, Metalized, Colorful

Material: BOPP/PET Holographic Base Film + EVA Hot Glue

Regular Thickness: 20micron -30micron

Maximum Width: 1800mm

Feature: This type of film can enhance the colorfulness of printed images and its effect through its unique laser pattern. This design has multiple color effects on printing. This holographic film has more than a hundred patterns, such as diamond patterns, heart-shaped, mini sparkles, dots, water ripples, flowers and so on.

Application: At present, this kind of holographic film is becoming more and more popular and widely used in food, medicine, gifts, cosmetics, wine, outdoor advertising, and digital printing.
