

Chemical Treatment Thermal Lamination Film

Item: Chemical Treatment Thermal Lamination Film

Color: Silver, Gold and other colors according to Pan tone

Regular Thickness: 17micron - 30micron

Normal Finishes: above42dynes

Chemical Treatment Finishes: reaches 52dynes

Maximum Width: 1600mm

Paper Core: 1", 2", 2.25", 3", 6"

Application:!! is used to laminate on the daily consumable packing box, such as the box of grocery, medicine, wine etc.

This film with chemical treatment is designed to enhance adhesion to various inks and coatings. On metalizing the chemically treated side, it shows enhanced metal adhesion. It is used inflexible packaging and metalizing application which require increased bond strength and adhesion. Do not corona treat the chemically treated surface, since this would destroy the adhesion properties.
