## Digital Thermal Lamination Film

Digital thermal lamination film, also called super sticky thermal lamination film, It's a BOPP based film, which is high adhesion and more sticky on digital prints, especially use for the digital printing materials. It is suitable for the digital printer, such as XEROX Docu Color 8000 /5000, HP Indigo Press 7000, Canon digital printer and so on.

The surface of the printing products will be more smooth and shiny after laminating, thus improve the glossy and color fastness of the printing materials as well as the bright color and stereo feeling of the graphics.
